(Redirected from MIL-STD-6016) Link 16 is a military tactical data link network used by NATO and nations allowed by the MIDS International Program Office (IPO). Its specification is part of the family of Tactical Data Links. With Link 16, military aircraft as well as ships and ground forces may exchange their tactical picture in near-real time.

TACTICAL DATA

NATO STANAG 5516/MIL-STD-6016 describes the TADIL J
message formats and Link 16 network instructions. There are
immediate operational requirements for existing military
simulations to exchange TADIL J/Link 16 data using a single
interoperable standard. Several protocols have evolved to satisfy
specific needs.

joint tactical operations.

MIL-STD-6016 : Tactical Data Link (TDL) 16 Message Standard defined by MIL-STD-6016). In this report, we use TADIL J only for the message formats and protocols. NATO has a different view of this terminology. The TADIL J messages and protocols become “ Link 16 ” (STANAG 5516), while the JTIDS communication element becomes “ MIDS ” (STANAG 4175).
